EXPERIENCE

OMS Labs | Virginia, United States
Full-Stack Developer
JANUARY 2025 - PRESENT

- Built admin dashboards enabling OMS staff to create, update, and manage embedded resources with automatic syncing to the user end.
- Designed and implemented the **OMS Teachings Tracker Tool**, allowing members to browse teachings, open original lessons, and track completion across article, audio, and custom lesson formats.
- Collaborated with designers, product engineers, and content creators to translate cultural/indigenous knowledge systems into intuitive web applications.

Spacemates | Oslo, Norway
Mobile Development Engineer Intern
JANUARY 2024 - MAY 2024

- Designed and implemented user interfaces (UI) for various functionalities like search, listings, booking, and user profiles.
- Implemented location-based features like user geolocation and displayed nearby listings on a map.
- Employed techniques like code splitting, lazy loading, and image optimization to ensure a smooth user experience.
- Developed the front-end logic to interact with back-end APIs for tasks like user authentication, search queries, booking management, and user communication.
- Performed unit tests to resolve API communication and user interaction issues.

Hackmamba | Delaware, United States
Frontend Engineer & Technical Writer
SEPTEMBER 2021 - MAY 2025

- Created clear and concise articles, documentation, and user guides on different product use cases.
- Utilized front-end frameworks (e.g., React, Next.js, Nuxt.js) to build user-friendly and visually appealing demos that effectively communicate product capabilities.
- Optimized content for search engines (SEO) to improve discoverability and reach a wider audience.
- Conducted in-depth research on client products, understanding their features, target audience, and desired user experience.

INDUSTRY KNOWLEDGE

Software Engineering

Responsive Web Design

Technical Writing

SKILLS AND TOOLS
